Product Feature AND Application of the Automotive Black Anti Slip Rubber Floor Mats:

Automotive anti collision rubber mats function one: prevent abrasion

The main role of rubber anti-collision strip is to prevent the side of the car body from being scraped or hit by foreign objects, and the main role of daily protection in life is to play. And because the volume of the car collision strip is very small, so in the car body is accidentally scraped when will play a certain role in protection.

Function two: increase movement

Rubber anti-collision strip, also known as the protection strip, it can not only protect the car, the anti-collision strip affixed to the car can not only protect the car but also play a decorative role, increase the line and dynamic car body.
